

Parallel Runway Extension

We are working to extend the parallel runway northward to 2,500 meters so as to accommodate large aircraft on the runway and increase capacity. The longer runway is expected to be ready some time in fiscal 2009. The following is a brief explanation of the main features of the project.

- ① **Parallel runway extension**
Extend parallel runway northward by 320 meters to 2,500 meters.
- ② **New taxiway**
Extend parallel taxiway and construct eastern taxiway
- ③ **New apron installation**
Construct new apron with additional stands to accommodate growth in traffic.
- ④ **Scheduled date of completion**
October 31, 2009 (scheduled for commissioning by March 31, 2010)
- ⑤ **Aeronautical lighting and radio navigation aids installation**
Install aeronautical lighting and radio navigation aids for parallel runway extension.
