Shuttle bus,  
more  
convenient!

## New Digital Signage at The Terminal Shuttle Bus Stops will Display Real time Bus Locations

NAA is installing new digital signage at the 5 terminal shuttle bus stops in the airport to provide greater convenience to customers moving between terminals. The new signage uses a bus location system\*1 to display the real time locations of the shuttle buses.

The system will enable passengers waiting at the shuttle bus stops to see at a glance how many minutes to wait before the bus to arrive at their bus stop and how many minutes it will take to their terminals.

### Overview

#### (1) Information Displayed

Time to arrival of terminal shuttle bus, traveling time to destination and diagram of bus routes, etc.

\* Design may change

\*1 Bus location system: GPS devices on the buses transmit location information (latitude and longitude) at regular intervals. Present locations of the buses are monitored and calculated by a server and by providing bus location and information concerning proximity to bus stops via the internet, offer added convenience to bus users.
