Spring Airlines to Launch Narita - Shanghai Pudong Service on 27 October

Spring Airlines (IATA code: 9C) will launch a new service between Narita and Shanghai Pudong Airport on 27 October 2019. Spring Airlines, based in Shanghai, is China's largest low cost carrier (LCC) and has a tie up with the Japanese carrier, Spring Japan, which operates at Narita Airport. This is Spring Airlines first scheduled service to Narita Airport.

Shanghai is a bustling business city with row upon row of high-rise buildings but also has a traditional streetscape. Xintiandi with its reconstituted traditional "shikumen" stone houses is popular with foreigners and young people. The tree-lined streets are full of stylish cafes with photogenic outdoor seating as well as authentic jazz bars in a pleasant setting where the old and new exist side by side.

Narita Airport remains committed to expanding its network of destinations so that we can offer a greater level of convenience for our customers. Take advantage of Narita Airport's extensive network, now bigger and better with Spring Airlines' new Shanghai-Pudong Service.
