ZIPAIR to Launch New Narita - Seoul (Incheon) Passenger Service on 16 October 2020

ZIPAIR (IATA code: ZG) will launch a new passenger service from Narita to Incheon Airport in Seoul on 16 October this year. The carrier presently operates cargo flights between Narita and Seoul and Narita and Bangkok, and this will be its first passenger service. It will also be the first Japanese airline to operate a passenger service between Narita and Seoul.

ZIPAIR aims to offer a "new basic airline" using aircraft equipped with full-flat seats and providing a level of Japan quality service to reduce the flight time experience. The new service provided by ZIPAIR is expected to bring the two nations closer and contribute to growth in their economic activities.

Narita Airport will continue to expand its network to offer our customers a more convenient selection of destinations. We invite you to take advantage of the network of destinations and services provided by Narita Airport, now made even better by ZIPAIR's Seoul service.

The many faces of Seoul
