

*First service
in Japan*

27 July 2022

Fly Gangwon to Launch Narita - Yangyang Service on 30 September 2022!

Fly Gangwon (IATA code: 4V) will launch a new service between Narita and Yangyang on Friday, 30 September 2022. The service is the first scheduled passenger service between Japan and Yangyang and the airline's first route to Japan. Fly Gangwon is a startup South Korean airline based at Yangyang International Airport and began operating in November 2019. It offers competitive prices and service under its own brand which is not affiliated with any major airline group in Korea.

Located in Gangwon Province in South Korea, Yangyang is blessed with a lush natural environment, and is popular for the many "Korean Wave" locations used in Korean dramas and K-POP music videos. The new service is expected to inject more stimulus into ties between Japan and South Korea, particularly in the area of tourism from Japan.

Narita Airport will continue to expand its network to offer our customers a more convenient selection of destinations. Take advantage of Narita Airport's network, now even more convenient with the new Fly Gangwon service.
