

Narita Network Expansion in 2015 Summer Schedule (Bulletin #2)**- ANA Further Expands Network From Narita !! -**

Tokyo, 21 January 2015: NAA is delighted to announce further expansion in the international network of All Nippon Airways (IATA code: NH, hereinafter "ANA") at Narita Airport from the 2015 summer schedule. This will include the launch of the new Narita - Kuala Lumpur route and additional flights on the Narita - Honolulu route.

ANA currently serves six routes to South East Asia from Narita and the new Kuala Lumpur service will be its seventh. With this addition, ANA will have the largest network to South East Asia from Narita Airport, operating 63 flights a week.

The launch of this Kuala Lumpur service, departing Narita early in the evening, will not only offer new options for customers flying out of Japan but also improve convenience for transit passengers from North America.

NAA very much welcomes this development as, with the additional flights to Honolulu, the expansion of network to North America and South East Asia will enable Narita to capture the robust business demand and demand for visits to Japan in South East Asian countries, harnessing the dynamism of Asia. Such new development will also consolidate Narita's function as the key link between North America and Asia.

Narita Airport will continue to grow side by side with ANA's network expansion.
