

New Service

**Announcing Japan's First Direct Scheduled Airline Service to Poland!
- LOT Polish Airlines to Launch Narita-Warsaw Operation -**

Tokyo, 19 June 2015: Narita International Airport Corporation (NAA) is pleased to announce that LOT Polish Airlines (IATA code: LO) will launch new service between Narita and Warsaw as described below, commencing on Thursday, 14 January 2016.

LOT, Poland's national flag carrier, commenced operation in 1929 and has a history dating back 86 years. As the leading airline in Central and Eastern Europe, LOT will operate the first scheduled service linking Japan with Poland.

This new service provides a bridge to the Central and Eastern European region where Narita Airport's network has so far been missing a direct link. With smooth connections at the compact Warsaw Airport which is LOT's home base, it will provide convenient access not only to Poland's domestic destinations, but also to popular locations in Central and Eastern Europe such as the Czech Republic and Hungary.

Narita Airport is delighted to welcome the arrival of a new airline customer from Europe (not including Far Eastern Russia) for the first time in almost eight years since 2008. We greatly look forward to the addition of a new destination that will enable us to offer an even more convenient network to our customers extending throughout Europe.

Enjoy air travels on Narita's extensive network.

PRESS RELEASE

FROM TOKYO DIRECTLY TO WARSAW – LOT POLISH AIRLINES ANNOUNCE A NEW LONG-HAUL CONNECTION

Warsaw, 19 June 2015 – LOT will fly from Tokyo Narita to Warsaw Chopin Airport. This is the first direct connection from Japan to Poland and Central-Eastern Europe, and first announced by LOT after successful restructuring process which ends already in 2016. First flight from Tokyo Narita to Warsaw will take off on January 14th. Reservations already available.

For passengers from Japan, Poland, CEE and Japan, Narita – Warsaw slightly more than 10-hour flight guarantees the most convenient and most efficient travel on this route. At the beginning LOT will operate flights from Tokyo to Warsaw on Thursday, Saturday and Monday and from Warsaw to Tokyo three times a week, on Wednesday, Friday and Sunday in accordance to the following schedule:

From January till the end of March (winter schedule):

WAW - NRT LO79 15:00 - 09:20+1 (local times)

NRT - WAW LO80 11:05 - 14:40 (local times)

This schedule gives to both outbound and inbound passengers short and convenient connections to dozens other destinations in Europe such as Riga, Prague, Budapest, Geneva, Copenhagen, London or Paris.

LOT will be the first new European entrant to Narita for the first time in nearly 8 years. The new route will provide greater convenience for both Japanese and European passengers.

"Thanks to this new connection to Japan LOT's hub will play even more important role. Already now, our connections ensure the most effective and much shorter transfer times than larger transfer hubs in the Western Europe. This means a measurable benefit for both business and leisure passengers who, choosing LOT, will now fly from Poland or other countries in Europe to Japan in the most comfortable and time efficient way" – said Sebastian Mikosz, CEO of LOT Polish Airlines. "Tokyo is today one of the major Asian business centers and a major tourist destination. Business relations between both countries are growing stronger. An in-depth analysis has shown that the choice of the first long-distance destination was quite obvious" – he added.

All flights will be operated by the most modern aircraft in the world – Boeing 787 Dreamliner in the configuration of three travel classes – LOT Economy, LOT Premium and LOT Business Class.

LOT will introduce several services especially for customers from Asia: the menu will include Japanese cuisine and the in-flight entertainment system will feature movies of Japanese production. The whole in-flight entertainment system will be available in the Japanese version.

About 15 thousand people travelled to Japan from Poland in 2013, which is an increase of about 45% comparing to 2012. 136 thousand people travel from the whole region of the Central and Eastern Europe annually. As many as 41 thousand people arrive from Japan to Poland and 245 thousand to the Central and Eastern Europe every year. At least 2 percent year-over-year increase is forecasted in subsequent years.

Roundtrip travelers include both tourists and a large number of businessmen. About 300 Japanese companies operate in Poland, including over 80 Japanese companies with production lines. Trade value is also significant. Only last year, goods

worth 770 million euros were exported from Poland to Japan and goods worth over 1.2 billion euros were exported from Japan to Poland.

Warsaw – Tokyo – Warsaw will be the first connection, which will be inaugurated after the formal completion of LOT restructuring process at the end of 2015.

Asia is the natural direction for LOT long-haul connections. It is confirmed by a success of carriers direct flights to Beijing operated since 2012. Connection to Tokyo will be the second Asian route after Beijing in LOT regular flight network. It shows, among others, that LOT ceased to be an ethnic carrier and became the line of first choice also for Asian clients, including business people who appreciate product quality and service standard on the board of LOT Dreamliner, which is supported by specially trained and carefully selected Elite Fleet staff.

Tickets are on sale in LOT distribution systems with starting price on the following routes:

WAW – NRT – WAW from 522 EUR

RIX – NRT – RIX from 581 EUR

MSQ – NRT – MSQ from 539 EUR

BUD – NRT – BUD from 499 EUR

PRG – NRT – PRG from 491 EUR

GVA – NRT – GVA from 546EUR

LHR – NRT – LHR from 690 EUR

Prices for many other connecting destinations are available at lot.com. Soon next step for LOT will be to announce several new short-haul destinations, for which operations will also start in the beginning of 2016. This will give its passengers even more interesting and convenient travel possibilities.

LOT Polish Airlines is a modern airline that connects New Europe with the world. It provides nearly 5 million passengers a year with the shortest and most comfortable travel options to over 40 destinations worldwide via Warsaw, a competitive hub that offers fast connections. As the only carrier in the region, LOT offers direct long-haul flights to the USA, Canada and China, while building its leadership position in East Central Europe. It flies one of the youngest fleets in Europe and, as the only airline, operates the Boeing 787 Dreamliner, the world's most advanced aircraft, on all long-distance connections. LOT relies primarily on the passionate and full of positive energy people, including the top ranking pilots in the global aviation business, often champions in many aviation sports. With 86 years of experience, LOT is also one of the oldest airlines in the world and the most internationally recognized Polish brand. This recognition is proven by the numerous awards from industry organizations, media and, above all, from the passengers.
